

*Building Science Concepts: Properties of Sound.* (Book 19)

There are opportunities in this section for children to be hands on with the instruments and creating the sounds for themselves, which addresses another method of teaching to consider the hands on kinetic learners within the classroom.

<http://www.sciencekids.co.nz/gamesactivities/changingsounds.html>, this interactive animation also provides an academic aid for the children about understanding musical instruments. Throughout the animation, children will be able to explore pitch and volume, which relates to the question, “How can we change the pitch of the instrument?”
